

Where Learners Grow. Their Way.

Neuroscience-Based LMS That Turns Potential Into Success

Empower your classrooms with tools that turn decades of neuroscience research into actionable strategies to make learning meaningful for every student and inspire creativity in every teacher.

Grounded in science. Built with purpose.

- * Personalize learning with neuroscience-backed strategies to ensure every student succeeds.
- * Elevate administrative efficiency with purpose-designed AI tools.
- * Empower teacher growth and well-being by reducing their workload and fueling creativity.
- * Bridge curriculum and equity gaps with consistent unit plans and individualized approaches.

“ It’s nice to see a company that goes above and beyond to offer an evidence-based platform, working closely with neuroscientists to ensure their use of AI respects child development and adheres to high ethical standards.

• *A.S. Seret, Executive Director*

Meet Your Neuroscience-Trained AI Companion

Fine-tuned on neuroscience principles, Cleo personalizes study strategies for every student while acting as a 24/7 co-pilot for teachers, providing the clarity and confidence they need to succeed.

For students

- ⤴ Lesson chunking into manageable steps
- ⤴ Spaced repetition to activate long-term memory
- ⤴ Memory retrieval to build stronger connections and ensure retention

For teachers

- ⤴ One-click lesson creation and planning based on neuroscience
- ⤴ Automatic grading and feedback
- ⤴ Brainstorming partner that reduces the overwhelm

All-in-one ecosystem designed for real-world classrooms

All the features educators know and love amplified with neuroscience insights and AI capabilities, enabling you to not just ease the workload, but truly move the needle on student success.

Brain-based instruction strategies

Integrated neuroscience principles helping teachers design lessons that deepen understanding and ensure long-term retention

Neuroscience-trained AI companion

Real-time AI guidance designed to simplify educators' workload while creating measurable and lasting improvements for students

Teacher workspace

Comprehensive tools streamlining administrative tasks and empowering educators to focus on instruction quality and individualized approaches

Student vision

Tools that empower students to connect their passions, values, and strengths to clear goals, and wire their brains for motivation and resilience

Student study skills

Real-time, neuroscience-based support for students to build effective study habits, deepen understanding, and connect effort to results

Schedule automation

Automates the scheduling process, removing errors, resolving conflicts, and saving administrators hours while generating optimized timetables

Neuroscience data analytics

Granular insights on student performance, lesson impact, assessment efficiency, providing comprehensive overview of study outcomes

AI enhanced evaluation

A data-informed evaluation loop that provides actionable feedback, promotes ongoing growth, and strengthens learning outcomes

The game-changing approach that drives results

Cleo isn't just another tool. It's a game-changer. Developed in collaboration with educators and neuroscientists, it enables consistent application of brain-based teaching and learning strategies to boost instruction quality and study outcomes.

Practical applications

Applies cognitive strategies like spaced learning and retrieval to guide effective unit design

Consistently integrates evidence-based principles across various instructional approaches

Uses embedded self-study tools to enhance understanding

Measurable outcomes

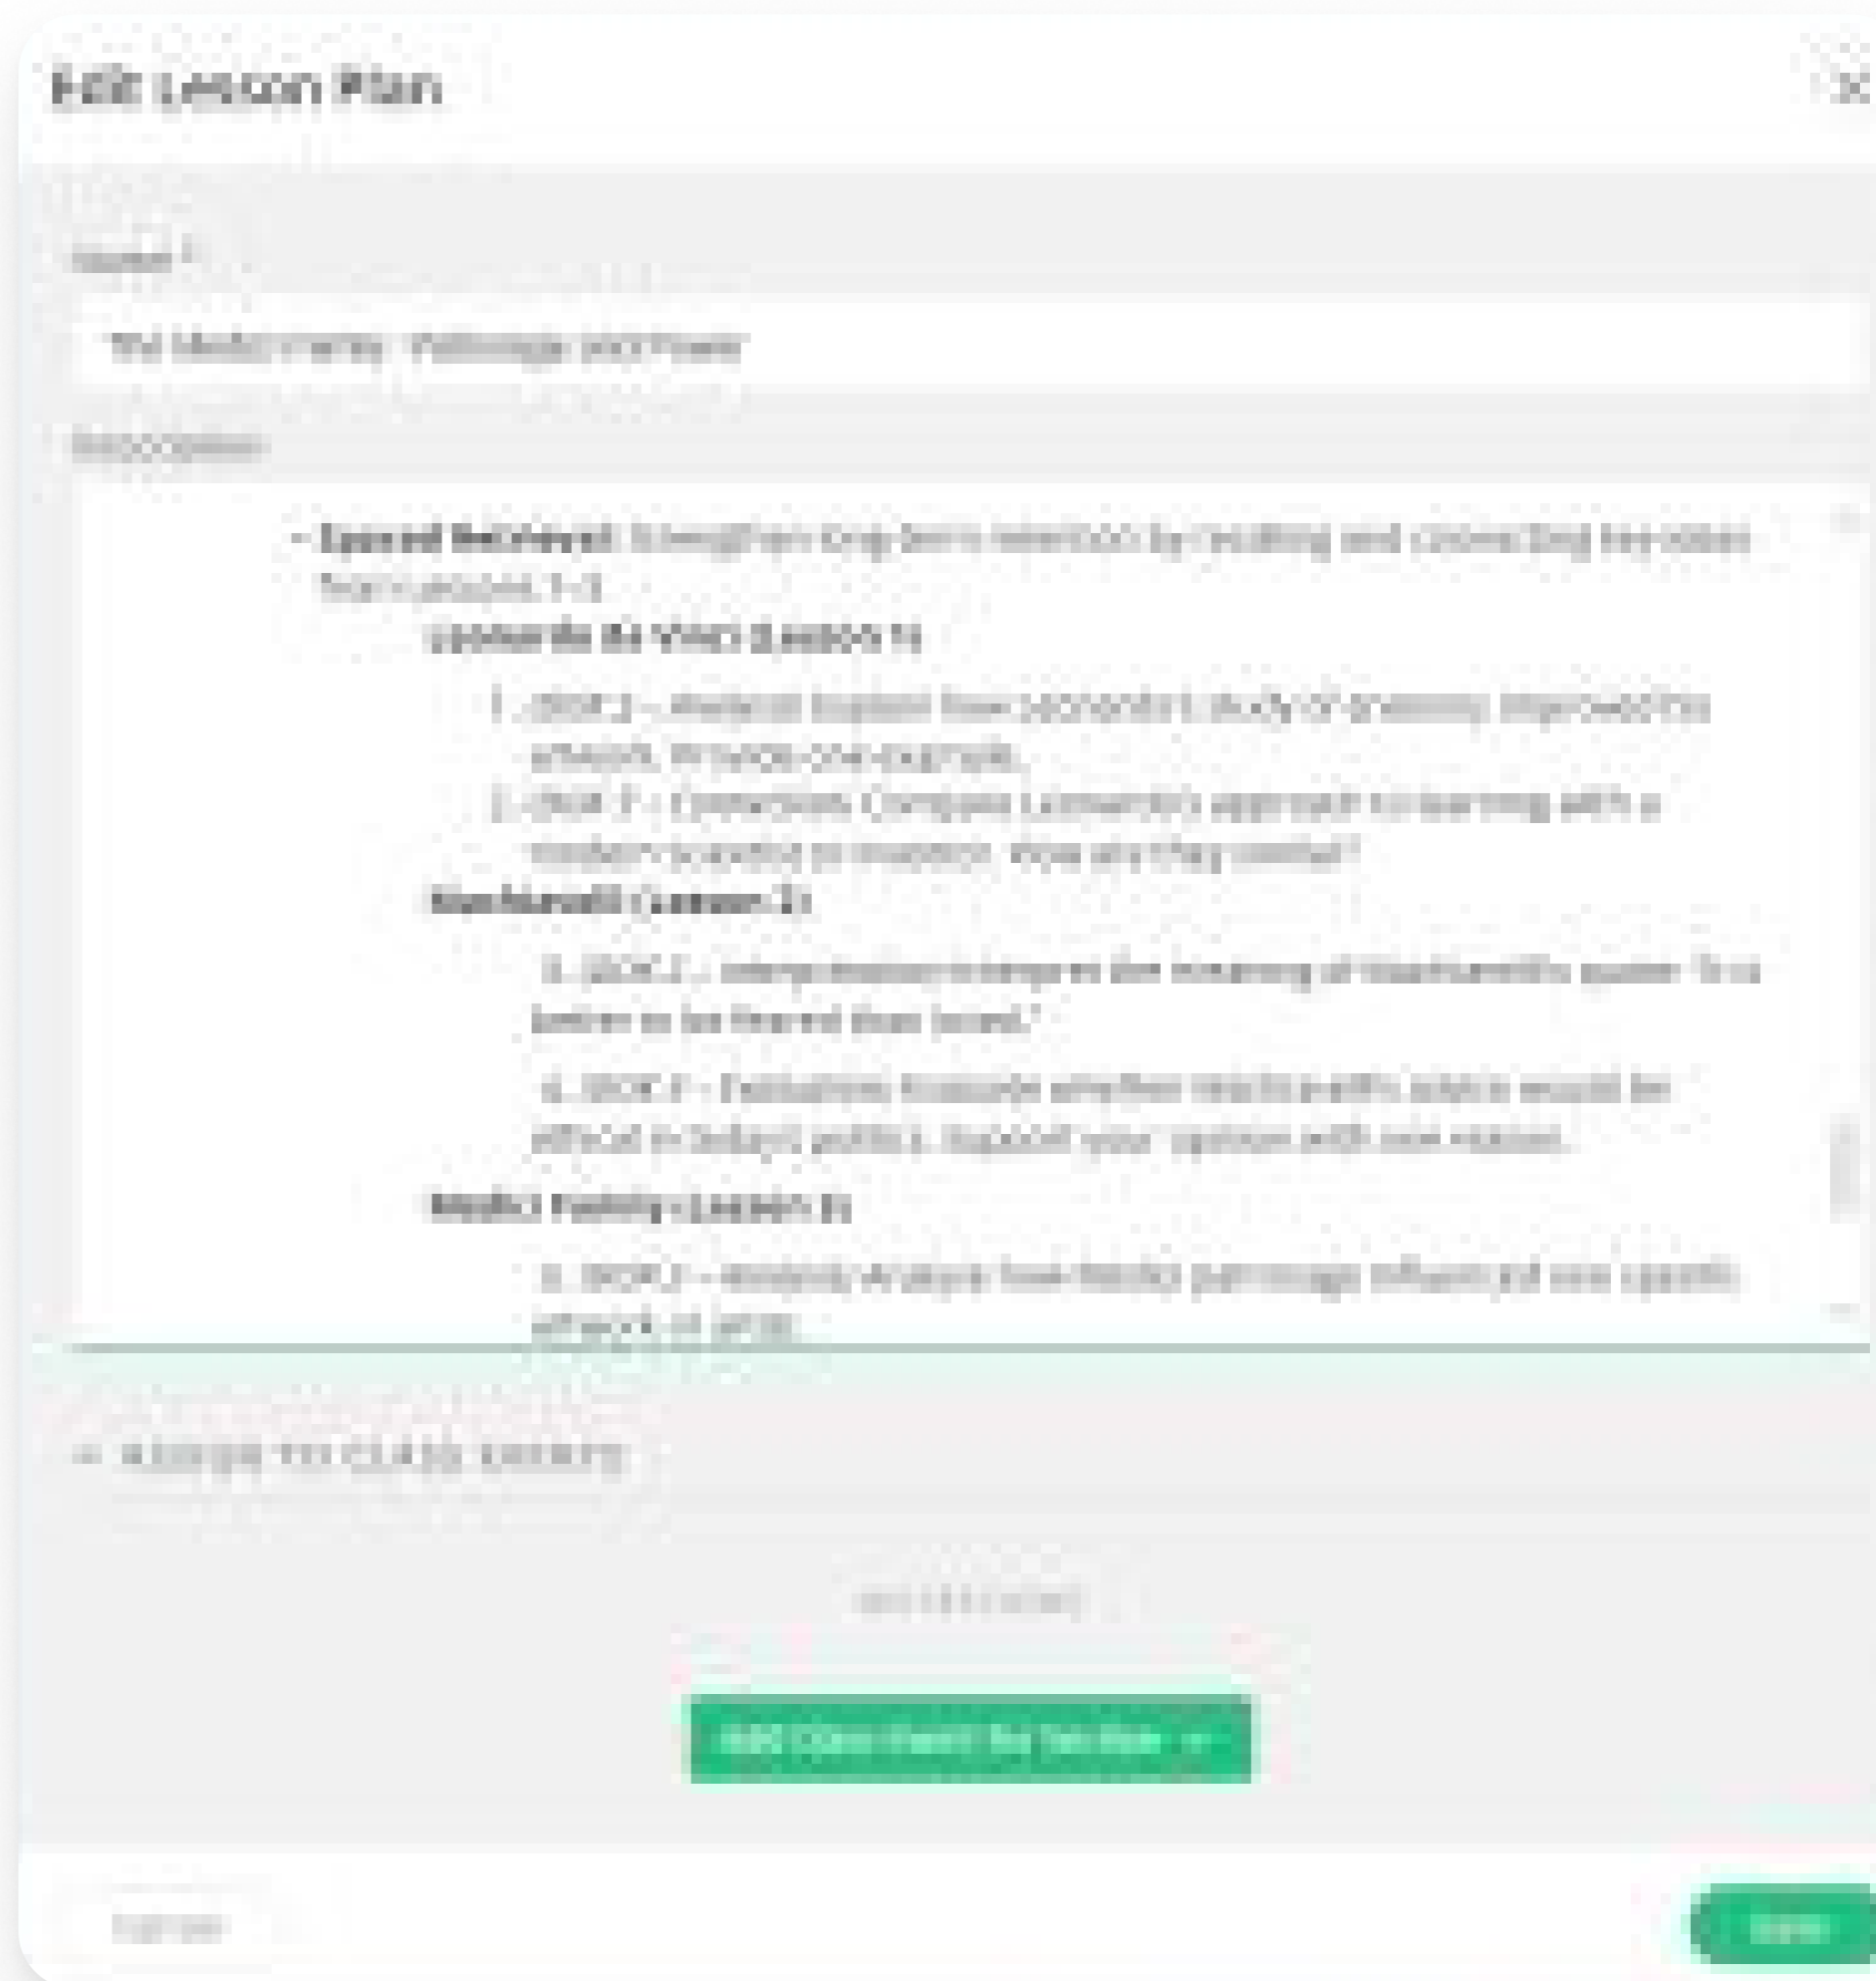

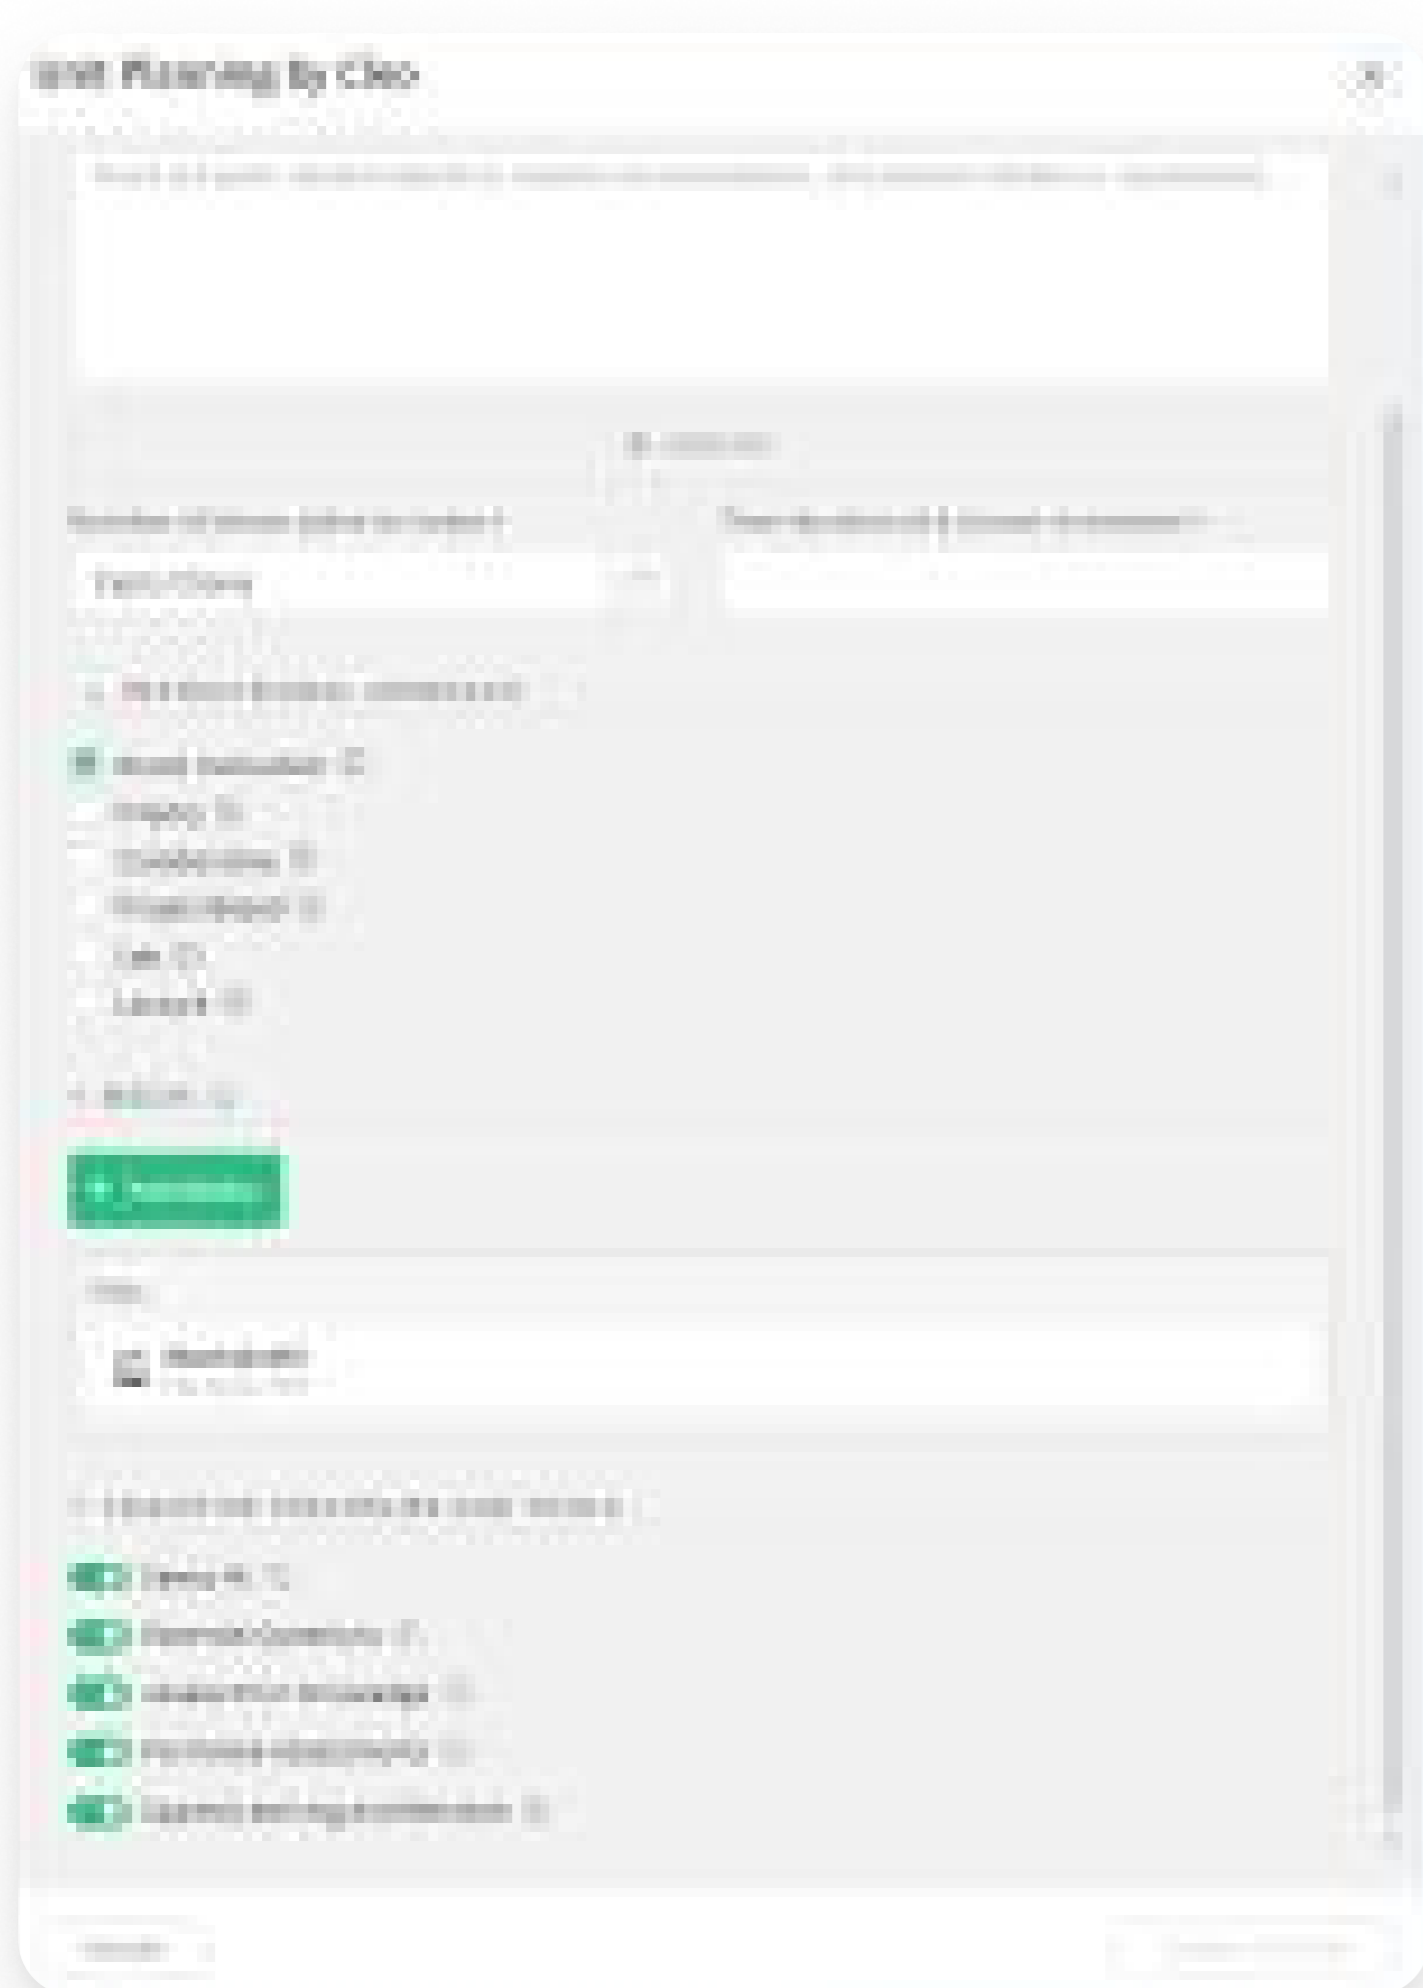

Helps improve teaching quality and classroom engagement

Optimizes future instructional planning and learning outcomes

Fosters self-awareness, intrinsic motivation, and engagement

The science of learning in action

Recognized as a critical resource to address the learning crisis, the science of learning offers evidence-based approaches for effective learning management. Now you can consistently translate the valuable neuroscience findings into actionable classroom strategies using your AI companion.

Responsible AI for education

- * Responsibly Designed AI certification by Digital Promise, an independent body enforcing rigorous standards for AI use in education
- * Transparent data collection, usage and security practices
- * Inclusive AI development with continuous monitoring for algorithmic bias

Painless change management

- * Personalized onboarding and dedicated support to ensure seamless platform implementation and integration with key tools
- * Exclusive access to practical neuroscience training for your educators
- * Guidance in setting up clear goals aligned with your school's or district's unique needs

Boost school success and administrative efficiency

Get access to a comprehensive set of tools that help you overcome curriculum and equity gaps, reduce teacher frustration, and boost learning outcomes - all within a single academic year.

Student growth

Equip every child with skills they need to succeed beyond classroom.

Teacher empowerment

Improve instruction quality and your educators' well-being.

Administrative efficiency

Streamline operations and enable data-informed educational strategies.

Educators

Reduced weekly workload by 5-7 hours; improved instruction quality

Parents

Transparency that builds trust and ensures effective involvement

School admins

Curriculum consistency and relevance for improved outcomes and equity

Students

Increased confidence, resilience, and sense of ownership

About CheckIT Learning

A team united in a mission to empower every single student to turn their unique potential into real success.
